

**JAMZ is Officially suspending the Six Flags Discovery Kingdom Cheer Competition
Frightfest Classic scheduled for Sunday October 15, 2017.**

As of 11AM today, nearby fires are only 3% containment and air quality is Red Index 161 Unhealthy. We can't in good faith send our Children, Coaches, Staff, Judges and Families to breathe smoky air into their lungs during an all-day outdoor event. While the local weather on Sunday will be sunny and beautiful, Vallejo schools and athletic activities are closed through Tuesday October 17 due to air quality (predicted AQI 136-500).

JAMZ had a nearby High School Gym on standby as an alternate location, but the air quality at that location has caused the school district to shut down schools as of this morning.

We are extremely sorry for the late notice as we held off hoping the winds would subside or shift which would cause both the devastating fire and smoke in the area to decrease. Thankfully for the firefighting effort, winds *have* subsided this morning. However local weather charts predict winds to increase to 20+MPH on Saturday. We're at Mother Nature's mercy as to what air quality this would present our families on Sunday.

Additionally, numerous programs whose homes have been evacuated or teams effected have been unable to practice due to this disaster. They need time to get their lives together.

JAMZ has offered TWO alternative championships to the Coaches registered for the event.

Please contact your team contact if you have any questions or concerns on what option they have chosen.
